

INTRODUCTION

RIM

RIM Consulting Ltd. has recognised the need to support the international mobility of higher education students. The main profile and primary activity is to search for foreign citizens intending to continue their studies in Hungarian higher education institutions and assist their application and entry. Our services include the administration of student visas, courses to prepare the applicant for the entry requirements (specialized, general and linguistic) and a 24/7 call-center support to help with everyday issues. Our company undertakes all management related to the entry and welfare of our future students.

Reliability, experience, expertise, creativity! RIM Consulting Ltd.
Contact us for your personal offer!

HUNGARY

Hungary lies in the heart of Europe in the Carpathian Basin with the population of 10 million residents. Since the establishment of the Hungarian state in 895, the citizens of this country have contributed significantly to the enrichment of the European culture in arts, music, literature, sports, science and technology. The country through its enchanting natural attractions, thermal waters and cultural events is one of the most popular tourist destinations in Europe.

PÉCS

Pécs is the fifth largest city of Hungary, founded by the Roman Empire in the 2nd century, with a rich historical heritage. It is the home of the first University of Hungary founded in 1367., that is also among the first European universities. The city is famous for its vibrant scientific and cultural life. In 2010., Pécs was selected to be the European Capital of Culture, alongside Essen and Istanbul.

POSZT

The National Theater Meeting of Pécs (POSZT) has been organised in June by the “Hungarian Theater Society” in Pécs since 2001. This is one of the most significant events of the Hungarian theatrical profession, for which Pécs creates a festive atmosphere with various outdoor venues..

PEN

The University Days of Pécs (PEN) is a series of various programs organised for the university students of Pécs. The main goal of PEN is to bring together students from different universities, and to offer several fun and recreational opportunities. PEN awaits everyone with a unique festival atmosphere.

If you want to be a citizen of the University of Pécs, RIM Consulting Ltd. can help you. RIM Consulting Ltd. makes the start easier and with its care services it will follow you through the entire study period.

Administration of entry and student visa:

Under an exclusive assignment contract with our Company we undertake the required administrative procedure you need. Just sign the necessary documents and we take care of the rest in full.

Administration of the admission procedure:

After a positive authorisation process, we

- provide thorough information about the courses of the University of Pécs,
- provide verification of your pre-qualification,
- determine the need for the preparatory course,
- collect, check and certify the adequacy of your documents that are to be submitted
- register you for the entrance exam and book your venue

to fully facilitate your successful admission procedure.

Provision of residence in Hungary:

Our Company offers you various possibilities for accommodation during the semester, including dormitory accommodation, rented apartment or house, Airbnb, hostel, hotel, etc., according to your request. We liaise with the landlord, arrange rental, manage payment of the monthly fee, manage relocation, repair, maintenance and other individual needs.

Healthcare and property insurance administration:

During your stay in Hungary, in case of illness, we arrange complete administration for your healthcare, including the search for a medical doctor, hospital treatment, out-patient care, or provision of accompanying hostess on site. In preparation for extraordinary situations, we undertake the conclusion of insurance portfolios, from the submission of your claim to its validation and all administrative burdens.

24 hour call center and "Parental contact":

After the successful authorisation process, we do not leave you alone in a foreign environment. If required, you can join our 24 hour call center, where you can ask for help or information. You receive guidance in English in almost all areas of life, making your stay in Hungary easier and help you keep more focused on your studies. Furthermore, parents who wish to be officially informed about their child's welfare, studies and further educational opportunities in Hungary,

or cannot reach each other, can also contact the 24 hour call center for support.

Note: Our Company charges a fee for the described services, which does not include the university's tuition fee for the semester or academic year. About our prices please do not hesitate, contact us! Our Company provides its services only under an exclusive assignment contract, and does not guarantee the success of the exam or admission.

**OUR COMPANY IS AT YOUR SERVICE.

BEST OFFER FOR YOU!**

UP

The University of Pécs with its 20 000 students, with more than 4 500 international students, with 1 400 lecturers and researchers, with its 10 faculties is one of the largest higher education institutions in Hungary and the centre of knowledge within the Transdanubian region. Its roots date back to 1367.

The more than 80+ training programmes cover almost every field of science and art. The reputation and popularity of the university is enhanced by the great number of foreign students attracted to us by the courses held in foreign languages, the various exchange programmes and the 17 colleges for advanced studies. The PhD/DLA programmes are representing the highest level of education.

Thanks to its extensive networks of partnership and exchange programmes with

excellent universities in Europe, the United States and Asia, at the moment there are approximately 4500 foreign students studying at the University of Pécs, coming from more than 114 countries.

Due to the successful implementation of the Bologna education system, students can get involved in a dynamic, interoperable European higher education system. Instead of taking the traditional college and university courses, students first acquire an undergraduate (BA or BSc) degree, and then a Master's degree (MA or MSc). Those students who decided to dedicate some more years to science may apply for a doctoral training (PhD or DLA) as well.

In order to be eligible for university studies in Hungary, a student must demonstrate that they meet several requirements for the course or program. There are certain general entry requirements that all students must meet.

ELIGIBILITY

PREPARATORY COURSES: In order to be offered a place in a preparatory course, you must have successfully completed your upper secondary (high school) education or have been awarded a college degree.

BACHELOR PROGRAMS: In order to be offered a place in a bachelor's (first cycle or undergraduate) program, you must have successfully completed your upper secondary (high school) education and be able to demonstrate the minimum language requirement.

BACHELOR OF EDUCATION (BED) TRAINING: In order to be offered a place in BEd training, you must have been awarded a Bachelor's degree in Teaching by an internationally recognized university and be able to demonstrate the minimum language requirement.

MASTER PROGRAMS: In order to be offered a place in a master's (second cycle or graduate) program, you must have been awarded a Bachelor's degree by an internationally recognized university and be able to demonstrate the minimum language requirement.

PHD PROGRAMS: In order to be offered a place in a PhD program, you must have been awarded a Master's degree by an internationally recognized university and be able to demonstrate the minimum language requirement.

NON-DEGREE POSTGRADUATE SPECIALIST TRAINING: In order to be offered a place in Postgraduate Specialist Training, you must have been awarded a Bachelor's or Master's degree by an internationally recognized university and be able to demonstrate the minimum language requirement.

In addition, there are entry requirements that are specific to the course the student is applying for. Information on the specific entry requirements can be found on the individual program page.

BUSINESS AND MANAGEMENT

BSc in Business Administration and Management

The Business Administration bachelor program is accredited by EFMD Global, a leading international organization of business schools.

BSc Tourism and Catering

This programme is designed for students who are interested in tourism and catering, and would like to pursue a career in the field of one of the largest and fastest-growing economic sectors in the world.

MSc in Applied Management

This programme is designed for students who want to deepen their knowledge of business and raise it to a higher level.

MSc in Enterprise Development and Entrepreneurship

The enterprise development major enables students to engage with the theory of entrepreneurship in relation to how it is practised in Hungary, Europe and also internationally.

PhD in Business Administration

Developed on the basis of the Hungarian PhD program of the Doctoral School of Business Administration, it is as such nationally accredited.

MBA, PhD in Regional Development

The Faculty of Business and Economics at the University of Pécs established its International PhD Program in Regional Development for professionals who have collected several years of experience in their field working at national, regional and local levels of decision-making or at think-tank organizations.

LAW

PhD in Law

The remarkable connections of the Faculty and the multidisciplinary research method create a unique opportunity to undertake research in any field of law and the relating disciplines.

ENGINEERING

Architecture (BSc + MSc)

This program trains students to apply their complex knowledge in the areas of architecture and urban planning, as well as in the multi-faceted field of environment formation in general.

BSc in Architectural Engineering

This program trains students to apply their complex knowledge in the areas of architecture and urban planning, as well as in the multi-faceted field of environment formation in general.

BSc in Civil Engineering

This program is accredited by the Institute of Building Construction and meets the requirements to train innovative, up-to-date civil engineers who go on to design cities with structure.

BSc in Computer Science Engineering

The Bachelor of Computer Science Engineering focuses on design and technology within a 7-semester undergraduate training.

BSc in Electrical Engineering

Future electrical/electronic engineers study here, who will solve high quality tasks in the field of design, manufacture and operation of electric and electronic appliances, equipment and facilities.

DLA in Architecture / PhD in Architectural Engineering

The Breuer Marcel Doctoral School offers doctoral programmes in architecture with a main focus on heritage protection and energy design.

Engineer Assistant - Airline Pilot

One of the main objectives is to provide a professional learning environment utilising state of the art equipments as well as introduce the students to industry leading safety and just culture in order to enhance aviation safety and improve human factors.

MA in Interior and Spatial design

The aim of the program is the training of interior design artists who, in liaison with architects and other design professionals, are capable of solving issues regarding aesthetic, functional, and psychological aspects of a given space or spaces.

MSc in Architectural Engineering

This programme trains students to apply their complex knowledge in the areas of architecture and urban planning, as well as in the multi-faceted field of environment formation in general (architectural design, town and country planning, preservation of built heritage, structural design, construction work, management and administration tasks, consulting with authorities, teaching, etc.)

MSc in Biomedical Engineering

The aim of the program is to train engineers who have interdisciplinary theoretical and practical knowledge and skills, complementing their basic knowledge of engineering, IT, medical and health sciences.

MSc in Computer Science Engineering

The program aims to provide engineers from technical disciplines relevant to information technology sciences with the skills to pursue a career in computer and information engineering.

MSc in Structural Engineering

The course is aimed at people who are interested in building- structure, it is open to structural engineers, architects and civil engineers with a bachelor degree or a degree in a related field of study.

EDUCATION

BA in Pedagogy (Intercultural Educational Assistant)

At the University of Pécs, Faculty of Humanities you may study pedagogy and intercultural education as a Single Honours degree.

BA in Pre-school Teaching

This program is designed for students who want to pursue a career in early childhood education. It includes basic and intermediate studies in matters related to childhood, such as growth, development and learning.

Hungarian Language Courses: Preparatory Courses

International Studies Center offers complex and integrated preparatory programs for degree studies that meet the language development needs of international students and facilitate their integration into the context of higher education in Hungary.

Preparatory Courses in English

International Studies Center University of Pécs Medical School offers complex and integrated preparatory programs for degree studies that meet the language development needs of international students and facilitate their integration into the context of higher education in Hungary. International programs at Hungarian universities minimally require B2 (upper-intermediate) language level and you have to be knowledgeable in your chosen field of studies for admission.

HUMAN AND SOCIAL SCIENCES

BA in Archeology

The aim of the curriculum is to train undergraduate archaeologists, who are well prepared from the general knowledge of archaeology and the two chosen specialisations, thus able to acquire and systematize the knowledge independently.

BA in Communication and Media Science

Graduates typically work as journalists, editors and content producers at media companies, publishing houses, or as communication experts at commercial or state organizations and NGOs, responsible for press relations, event planning and advertisement.

BA in English and American Studies

Our goal is to develop professionals with a high level of theoretical and practical knowledge in the field of English Studies and related areas of the Social Sciences.

BA in Hungarian Literature and Linguistics

The Hungarian BA-program is designed to train experts in Hungarian language, literature and culture.

BA in International Relations

Educates students who want to learn about political systems, international relations, political institutions, history and various fields.

BA in Liberal Arts with majors: Art History, Classical Studies, Ethics, Film and Visual Studies, Philosophy

A degree in liberal arts provides ample career opportunities, graduates can be found in nearly all industries and professions thanks to the transferable skills this education ensures.

BA in Psychology

Social professionals are employed in a variety of multi-professional settings; and support individuals, families and communities that experience difficulties in their lives.

MA in Adult Education (Andragogy)

The aim of the program is to train adult learning and education professionals, who understand that education is a process of human, cultural and social development that takes place in the family/at home, in communities, in schools and the workplace.

MA in Archeology

The aim of the curriculum is to train professionals who are able to practice the profession of archaeologist with their general knowledge of archaeology and their knowledge of the chosen discipline and their auxiliary sciences.

MA in English Studies

The goal of the degree program is to train experts in the field of English Studies who have sound theoretical, methodological and practical knowledge of the English language and can apply such knowledge in practice.

MA in Human Resources Counseling

The purpose of this course is to educate and train professionals who are experts in providing help to organisations and companies regarding any area of human resources management, one of the functional areas of leadership counselling.

MA in International Relations

The goal of the MA degree program in International Relations is to train highly qualified experts with broad education in the social sciences who can interpret Hungary's place and role in the international situation and in Europe.

MA in Social Work

The study programme is designed to train Social Workers who are competent in Social Work practice and are prepared to introduce professional innovations while protecting human rights and representing the values of social justice.

MEDICAL AND HEALTH SCIENCES

BSc in Dietetics

Come and join us if you agree that “you are what you eat”, prefer to eat a smartly selected, large variety of foods, and would like to upgrade all this knowledge to the scientific level.

BSc in Midwifery

Midwifery is one of the oldest and nicest professions in the human history. The experts help the future mothers during pregnancy, childbirth and the postpartum time. The midwifery degree is automatically accepted in the European Union.

BSc in Nursing

The aim of the program is to train nursing and health care professionals who are able to take part with full responsibility in prevention, treatment, nursing and rehabilitation at all levels of health and social care.

BSc in Physiotherapy

The physiotherapist is much more than a masseur or aerobics instructor. The massaging and exercising is only a small element of the wide variety of techniques with which a physiotherapist creates magic: the joy of painless movement.

Dentistry in English

This programme provides complete theoretical and practical training in dentistry. The diploma issued by the Medical School is accepted by all European Union countries and several other countries (Norway, USA, Canada, Israel etc.)

General Medicine in English

The curriculum of the general medicine course in Pécs is designed to form a foundation upon which the future physician can

build his or her medical knowledge in a continuously evolving profession. The program of instruction consists of six years of pre-clinical and clinical studies (ten semesters and one year of clinical rotations).

MSc in Clinical Laboratory Science

The aim of the Master's Degree Programme is to train clinical laboratory research professionals who are familiar with the general and specific rules and requirements of clinical laboratory research, and are capable of actively conducting clinical laboratory research in practice.

MSc in Nursing APRN (Nurse practitioner)

The APRN provide patient-centered, high quality care by partnering with patients and their caregivers. Nurse Practitioners combine their clinical expertise with health prevention and health management and deliver a unique blend of nursing and medical care

Pharmacy in English

The Academic Program offered by the Faculty of Pharmacy leads to the Pharmacy degree with a Pharm. D. title.

PhD in Health Sciences

Interdisciplinarity is a major feature of our Doctoral School, as almost all sub-disciplines of Health Sciences are represented within the eligible research areas.

PhD in Medical Sciences (Basic Medical Sciences, Clinical Medical Sciences, Clinical Neurosciences, Interdisciplinary Medical Sciences, Pharmacological and Pharmaceutical Science)

The structure of the PhD programs of the Medical Faculty is similar to those of most European and American universities

MUSIC AND ARTS

BA in Ceramics Design

Our Designer Making BA program offers an opportunity to practice and improve in a wide range of activities. Students are introduced to the possibility of experimenting and combining design, material research, 3D design and 3D printing.

BA in Classical Music Performance (Flute)

BA in Classical Music Performance (Guitar)

BA in Classical Music Performance (Piano)

BA in Classical Music Performance (Viola)

BA in Classical Music Performance (Violin)

The goal of our BA programs in the field of classical music is to train professionals who shall be able to enrich and spread Hungarian and European music tradition via their performance as musicians.

BA in Classical Singing

The course helps students prepare for their role as a teacher. Its goal is to map out this task, to increase self-awareness, to understand and interiorize this role and to initiate taking on this task. It is important for students to interpret the activities, pedagogical roles and tasks in a pedagogical environment, from the teacher's perspective.

BA in Electronic Music and Media Arts

This program is recommended for those, who are interested in sound, noise, silence and their electronic / digital forms. For those, who don't accept the media of sound and vision in the closed box, but would rather open it for experimenting, improvising.

BA in Orchestral and Choral Conducting

Aim of the program: To educate musicians who - with their performing skills, theoretical knowledge, and highly developed musical abilities - enrich and spread the Hungarian and European music culture.

Graphic Artist Specialising in Graphic Design OTM (BA+MA)

Graduates of the training are familiar with the artistic traditions and outstanding works of contemporary art. They know the means of expression and possibilities of universal graphic arts, as well as its materials and techniques. Graduates possess the necessary knowledge to continue their studies in a doctoral level.

Kodály System Specialist Training Program

The objective of this Postgraduate Certificate Program, the Kodály System Specialist

Training Program is to train professionals of musical competences who are able to make their students feel the emotional dominance of musical education and consider the artistic, communicative, and educational function of music as well as its functions of personality development and conveying experiences.

MA in Ceramics Design

The University of Pécs, Faculty of Music and Visual Art's Ceramics department has a close partnership, and is located at the same site as the world famous Zsolnay Porcelain Factory in Pécs. Various types of forming methods from handcrafting to design and spacious studio places together with academic level personal tutoring provide the students the opportunity of finding their own artistic way.

MA in Choral Conducting

The activity of choral conductors holding a degree belongs to the field of choral art. It involves forming new ensembles, leading different types of choirs, actual conducting work.

MA in Classical Music Performance (Flute)

MA in Classical Music Performance (Guitar)

MA in Classical Music Performance (Piano)

MA in Classical Music Performance (Violin)

The Master of Music Programmes in instrument performance (Piano, Violin, Flute and Guitar) focus on developing music performance skills and artistic qualities on the highest level possible.

MA in Classical Singing

The students of the Opera Singing MA programme will receive a wide spectrum of theoretical and practical training during the four semesters of the programme.

Painting OTM (BA+MA)

The practicing and development of drawing skills as the base of the visual and imagery creation and through this the stimulation of a personal artistic way of observing, thinking and representing the world. The course makes known the basic rudiments and techniques of painting in the first years and then gradually grows towards becoming an artist.

Sculpture OTM (BA+MA)

Graduates are familiar with the means of expression and the opportunities of sculpture, as well as its materials and techniques. They are visual artists who possess the technical, professional, aesthetic and social science knowledge based on modern and classical foundations.

NATURAL SCIENCES

BSc in Biology

The study program offers complete education in biology with core subjects covering neurobiology, genetics, microbiology, animal and plant ecology, botany, zoology, and plant physiology.

BSc in Chemistry

The Chemistry BSc line offers full - 3-year -education - in chemistry. The study program offers complete education in chemistry, with directions in inorganic and organic chemistry, analytical and environmental chemistry, and physical chemistry.

BSc in Computer Science

The Computer Science BSc line offers full 3-year-education in computer science and programming. The aim of the course is to educate students who will be able to work in the IT sector as coders or software developers, or continue their studies.

BSc in Earth Sciences

The program provides a general bachelor level education in earth sciences and also offering the possibility to specialize in Geology. It includes introductory modules to Nature sciences, to Geology and also to Geography.

BSc in Geography

The Geography BSc line offers full 3-year-education in Geography. The study program offers complete education in geography, with special directions in Landscape and environmental studies, Regional and settlement development and also in Tourism. All three directions are supported by a strong GIS basis.

BSc in Mathematics

The basic courses include: Logics, Computer science, Linear algebra, Number theory, Calculus, Geometry, Probability theory and statistics and Game theory. Advanced courses include Mathematical programming and Operations research, Group theory, Computer algebra, Numerical methods and applied computer science.

BSc in Physical Training

The general aim of the program is to train students to become coaches. Trainers who gain a well-established theoretical and practical knowledge and skills to be able to plan and implement training sessions for junior players, youth and adult athletes, too.

BSc in Physics

The curriculum is organized in modules covering the Introductory courses in nature sciences (24 credits), Common courses (52 credits) for all physics students (basic courses in mathematics, physics and informatics). The courses related the specializations in Applied physics cover the advanced topics in experimental and theoretical physics, the necessary courses in mathematics and informatics.

MSc in Applied Mathematics

The aim of the Applied Mathematics master program is to train professionals who have a well-grounded mathematical and informational knowledge in a theoretically and practical way. They are able to gain knowledge in industrial, commercial, agricultural, logistics, communication, finance and computer science issues to be used for analysis, modelling and finding a solution for them.

NATURAL SCIENCES

MSc in Biology

The Biology MSc line offers full 2-year-education in biology. The study program for full-time training offers a complete education in biology, with special directions particularly in molecular biology (neurobiology, genetics, microbiology), and animal and plant ecology.

MSc in Biotechnology

The MSc course aims to educate biotechnologists who possess a high level of theoretical and practical knowledge of biotechnology with medical and pharmaceutical sciences in focus.

MSc in Chemistry

Chemistry Master of Science (MSc) studies can be joined at the Faculty of Science of University of Pécs. The students who have studied chemistry, biochemistry, physics, and pharmacy in undergraduate level (BSc) will complete their knowledge at Master of Science level.

MSc in Geography

During this 4-semester Master degree program, our students will focus on GIS methods and remote sensing tool applied in surface geomorphology both in a classroom environment and in the field. They will have the opportunity to join in and participate in research and scientific projects run by IGES. The Institute has research collaborations with global companies like ESA and SARMap, and international relations with research groups from Switzerland, Poland, Spain, Slovenia, China and the US.

MSc in Physics

In the Physics MSc course, we offer comprehensive knowledge. Those skills and subject groups such as Modern Physics, Optics and

Laser Physics, Physics of Quantum Systems, Atomic and Molecular Physics encompass the science of the main areas of Physics based on the bachelor's level of Physics.

PhD in Biology and Sport Biology

The Doctoral School of Biology and Sportbiology provides PhD studies in wide range fields of biology and sportbiology including genetics, microbiology, plant biology, ecology, regulatory biology, fitness, stress, sport and immune system.

PhD in Chemistry

The Doctoral School of Chemistry offers a four-year training and research program in a wide range of fields in chemical sciences, Analytical Chemistry, Bioorganic Chemistry, Homogeneous Catalysis, Chemistry of Coordination Compounds, Electrochemistry, Synthetic Organic Chemistry, Theoretical Chemistry, Environmental Chemistry, Biochemistry, and Separation Science.

PhD in Earth Sciences

The Doctoral School of Earth Sciences offers a four-year training and research program in various fields of geography, geology and meteorology.

PhD in Physics

The Doctoral School of Physics covers the fields that are the subjects of research in the Institute of Physics; namely, laser physics, including THz and X-ray laser research, nonlinear optics, generation of ultrashort laser pulses, laser based acceleration of particles, quantum informatics, theoretical atomic and molecular physics.
